

# Programming Objects in Clarion

## Table of Contents

<b>Struggling with Objects .....</b>	<b>1</b>
How to study this subject .....	3
The sequence of study topics.....	4
<i>What about ABC?</i>	
<i>Coding your own classes</i>	
<i>Template Wrappers</i>	
<b>Chapter 2 - The Theory of OOP .....</b>	<b>7</b>
OOP defined .....	7
Your first exercise (under a minute) .....	8
Encapsulation .....	9
<i>The CLASS statement</i>	
Instantiation .....	11
<i>How to instantiate a Class</i>	
<i>Which instantiation method to use?</i>	
Dot syntax .....	14
<i>Object naming in method code</i>	
<i>SELF</i>	
<i>The Microwave object</i>	
Constructors and Destructors .....	19
<i>Why use them?</i>	
<i>Why not use automatic constructors/destructors?</i>	
Extreme Encapsulation .....	20
<i>When to use the Private Attribute</i>	
Inheritance and Derivation .....	21
<i>Extending a class</i>	

<i>Overriding a class</i>	
<i>Multiple Inheritance</i>	
<i>Composition</i>	
Moderate Encapsulation .....	24
Overriding .....	25
More on Constructors and Destructors .....	26
PARENT .....	27
Polymorphism .....	28
<i>Virtual methods</i>	
Late Binding .....	32
Local Derived Methods .....	32
Interfaces .....	33
<i>Declaring the INTERFACE</i>	
Writing Interface Methods .....	35
<i>The Dark Side of Interfaces</i>	
<i>The Good Side of Interfaces</i>	
Summary .....	36

### **Chapter 3 - Applying OOP in Clarion..... 39**

Where to Start? .....	39
What about existing applications? .....	40
Back to Encapsulation .....	41
<i>Function Overloading</i>	
<i>How to code large CLASS structures</i>	
Instantiation and Inheritance .....	43
<i>Module and Link</i>	
<i>Instantiating multiple objects</i>	
<i>Manual instantiation</i>	
<i>Do not forget to clean up after yourself</i>	
Constructors and Destructors .....	47
Derivation .....	49
Overriding .....	49
Virtual methods .....	50
<i>The Debugger as Teacher</i>	
<i>The Virtual Apple Pie</i>	
<i>Moral of the story?</i>	
How to Make Any Kind of Pie .....	55
<i>One Last Concept</i>	
Summary .....	61

**Chapter 4 – ABC and OOP .....63**

Global objects ..... 64

Global embeds ..... 65

*How does ABC do files?*

Local embeds ..... 73

*ABC classes in relation to templates*

*Browse procedures*

*When to use an ABC embed or a control specific embed*

Working with ABC classes ..... 85

*The ErrorClass*

*Deriving from ErrorClass*

*Installing your Custom Classes*

*Using Custom Classes in an Application*

**Chapter 5 – Coding Objects .....95**

Design Considerations ..... 95

ABC Relation Tree vs. Relational Object Tree ..... 97

Designs ..... 98

*Navigation*

*Edits*

A Fast Way to Code a Class ..... 100

*The Start of the Relation Tree Class*

*Adding Properties*

*Adding the Methods*

*The Code for the Methods*

*Writing the code*

*A New Project*

*Summary*

Generic class ..... 113

*Automatic constructors and destructors*

*A Note About Init and Kill*

*How much is that List in the Window?*

*Keep Method Code Simple as Possible*

The RelationTree Class Methods ..... 120

*RefreshTree()*

*LoadLevel()*

*UnloadLevel()*

*NextParent()*

*PreviousParent()*

*NextLevel()*

<i>PreviousLevel()</i>	
<i>NextSavedLevel()</i>	
<i>PreviousSavedLevel()</i>	
<i>NextRecord()</i>	
<i>PreviousRecord()</i>	
Virtual Stub Methods .....	126
Edit Methods .....	126
<i>AddEntry()</i>	
<i>EditEntry()</i>	
<i>DeleteEntry()</i>	
<i>UpdateLoop()</i>	
<i>Contract and Expand</i>	

## **Chapter 6 – Writing Template Wrappers ..... 131**

Templates and Objects .....	132
<i>Class reader</i>	
Writing a new template .....	133
<i>The #SYSTEM statement</i>	
<i>#APPLICATION vs. #EXTENSION</i>	
<i>#CONTROL Template</i>	
<i>Loading ABC classes in memory</i>	
<i>Setting up Class Items and OOP Defaults</i>	
<i>Adding Global Prompts</i>	
<i>Exporting the class</i>	
<i>Adding Local Prompts</i>	
<i>Global Symbols and Objects</i>	
<i>A List of Objects</i>	
<i>Adding Local Declarations</i>	
<i>How to Add New Methods</i>	
<i>Clarion 5.5 vs. Clarion 6</i>	
<i>Generating the embed tree</i>	
<i>How to Call the Parent</i>	
<i>Adding Embed Points</i>	
<i>Scoping Issues</i>	
The Remaining Control Template Code .....	155
<i>The Control Interface Dialogs</i>	
<i>Formula Editor</i>	
<i>The Design of the Control Template</i>	
<i>What about icons?</i>	
<i>Local Data Embed</i>	
<i>ThisWindow.Init()</i>	

<i>ThisWindow.Kill()</i>	
Window Event Handling .....	162
<i>EVENT:GainFocus</i>	
Control Event Handling .....	162
<i>EVENT:NewSelection</i>	
The Generation of Method Code .....	165
The RelationTree Methods .....	166
Updating the RelationTree .....	175
Other Control Templates .....	178
<i>RelObjTreeUpdateButtons</i>	
<i>Control Event Handling</i>	
<i>Toolbar Issues</i>	
<i>Special Conditions</i>	
<i>Assignment of Edit Buttons</i>	
<i>RelObjTreeExpandContractButtons</i>	

## **Chapter 7 – Template User Guide.....187**

Registration .....	187
Adding the control template .....	188
Setting up the Relation Tree .....	190
<i>File Details tab</i>	
<i>Colors tab</i>	
<i>Conditional Color Assignments</i>	
<i>Icons</i>	
<i>Conditional Icon Use</i>	
<i>Local Objects</i>	
<i>Classes</i>	
<i>Finishing the Tree List</i>	
<i>The Embeds</i>	
Dynamic Link Library Issues .....	208
Congratulations! .....	210
